DETAILED ACTION

In response to applicant's election filed on February 7, 2005, the election of method species is withdrawn, and all of claims 1-7 are examined on their merits, as follows.

The disclosure is objected to because of the following informalities: In the last line of the Abstract, a period should follow the end of the line.

Appropriate correction is required.

Claim 5 is objected to because of the following informalities: In lines 3 and 4 of claim 5, "stop portion" should read –stop member--. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Slater (720).

Slater teaches a method of varying the diameter of a linear shank having a locking head, including providing a shank with a stop portion 1 on one end and a latch portion 12 on the other end, providing a sleeve 3 over the shank and retaining the sleeve on the shank, positioning the shank and sleeve within apertures of the different components to be locked as seen in figs. 4 and 5, and engaging the locking head 2 with the latch portion 12.

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

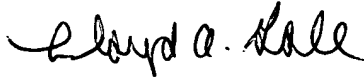

Claims 6 and 7 are allowed.
